## Bud's Blog: Template Modules

Template modules are mini-templates that produce nothing on their own but instead can be included into other templates. They are excellent for duplicated content (e.g. header or footer content) and can contain template tags or just static text.

<input type="checkbox"/>	Widget: Recent comments	-
<input type="checkbox"/>	Widget: Recent posts	-
<input type="checkbox"/>	Widget: Search form	-
<input type="checkbox"/>	Widget: Subscribe to feed	-
<input type="checkbox"/>	Widget: Tag cloud (sidebar)	-
<input type="checkbox"/>	Widget: Technorati Search	-

# Add the sitemeter code

The screenshot shows the Joomla! administrator interface for editing a template. The breadcrumb trail is "Main Menu > Bud's Blog > Templates > New Template". The page title is "Bud's Blog: Edit Template:". The left sidebar contains a navigation menu with categories: Posting (NEW ENTRY, ENTRIES, UPLOAD FILE), Community (COMMENTS, COMMENTERS, TRACKBACKS, NOTIFICATIONS), Configure (TEMPLATES, CATEGORIES, TAGS, SETTINGS), and Utilities (SEARCH, ACTIVITY LOG, IMPORT / EXPORT, REBUILD SITE, VIEW SITE). The main content area has a search bar for "Search Entries" and a "View Site" link. The "Template Name" field is empty. The "Widget" dropdown menu is set to "Sitemeter Code" and is circled. Below it is a field for "Link this template to a file". The "Module Body" section contains a large text area with the text "Paste the code here". The "Save" button at the bottom is also circled.

## Bud's Blog: Index Templates

Index templates produce single pages and can be used to publish Movable Type data or plain files with any type of content. These templates are typically rebuilt automatically upon saving entries, comments and TrackBacks.

## Widget Manager

Your changes to the Widget Manager have been saved. To see the changes reflected on your public site, you should rebuild your site now. [Rebuild my site](#)

To add a Widget Manager to your templates, use the following syntax:

```
<$MTWidgetManager name="Name of the Widget Manager"$>
```

### Widget Managers

[+ Create Widget Manager](#)

[Delete Selected](#)

<input type="checkbox"/> WidgetManager Name	Installed Widgets
<input type="checkbox"/> First Widget Manager	Technorati Search, Blog List, Calendar, Creative Commons, Monthly archive list, Recent posts, Search form, Subscribe to feed, Recent comments, Tag cloud (sidebar), Monthly archive dropdown
<input type="checkbox"/> sidebar one	Search form, Tag cloud (sidebar), Monthly archive dropdown, Blog List

# Select the widget

The screenshot displays the WordPress dashboard's Widget Manager. On the left is a sidebar menu with categories: Posting (NEW ENTRY, ENTRIES, UPLOAD FILE), Community (COMMENTS, COMMENTERS, TRACKBACKS, NOTIFICATIONS), Configure (TEMPLATES, CATEGORIES, SETTINGS), and Utilities (SEARCH, ACTIVITY LOG, IMPORT / EXPORT, REBUILD SITE, VIEW SITE). The main content area shows the breadcrumb 'Main Menu > Widget Manager > sidebar one' and the title 'Widget Manager: Rearrange Items'. Below this is a 'Widget Manager' tab and a 'Widget Manager Name' field containing 'sidebar one'. The 'Build WidgetManager:' section includes the instruction 'Drag and drop the widgets you want into the Installed column.' Two columns are shown: 'Installed Widgets' (SEARCH FORM, TAG CLOUD (SIDEBAR), MONTHLY ARCHIVE DROPDOWN, BLOG LIST) and 'Available Widgets' (CALENDAR, CREATIVE COMMONS, MONTHLY ARCHIVE LIST, RECENT COMMENTS, RECENT POSTS, SITEMETER CODE, SUBSCRIBE TO FEED, TECHNORATI SEARCH). The 'SITEMETER CODE' widget in the Available Widgets column is circled in black. At the bottom right is a 'Save Changes' button.
