

Ajax, Not Just for Mashups

Learn about the XMLHttpRequest too

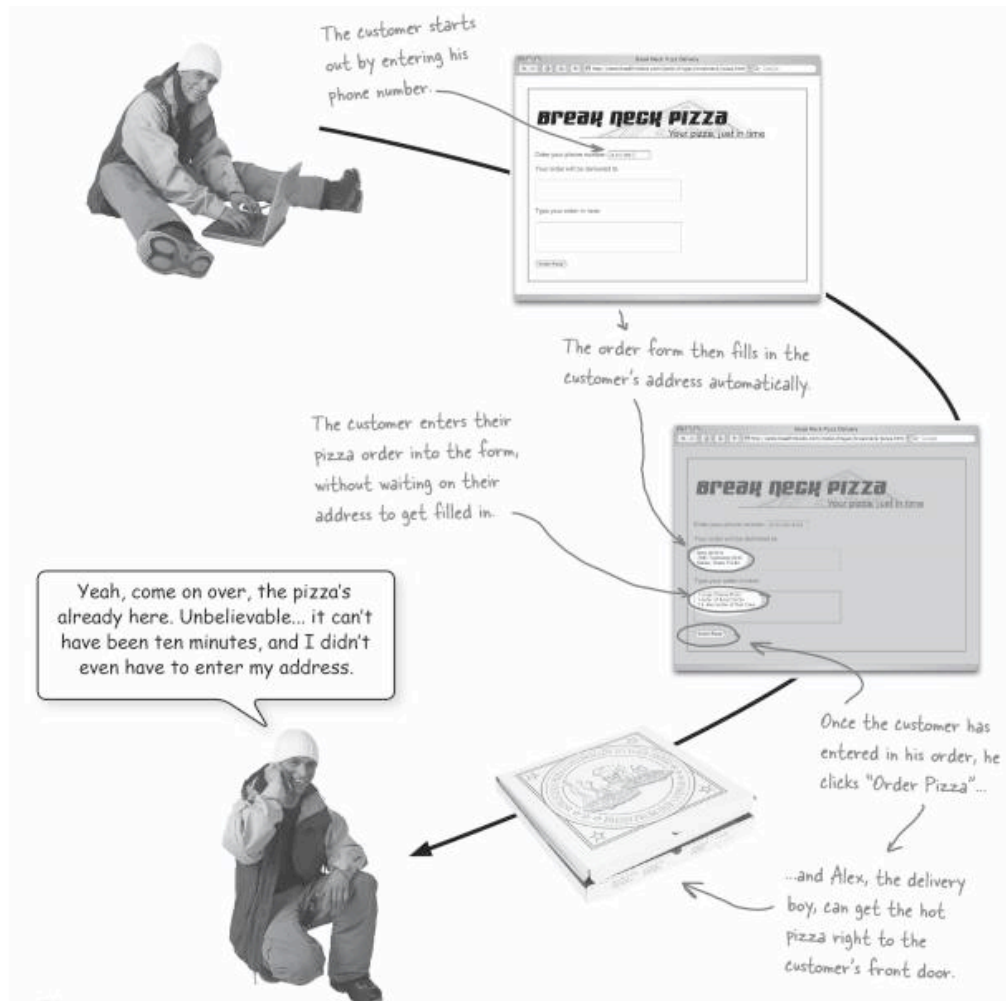

From the blogs

- Is dotnetnuke playing a role?
- Nice interaction around Shoko's contributions.

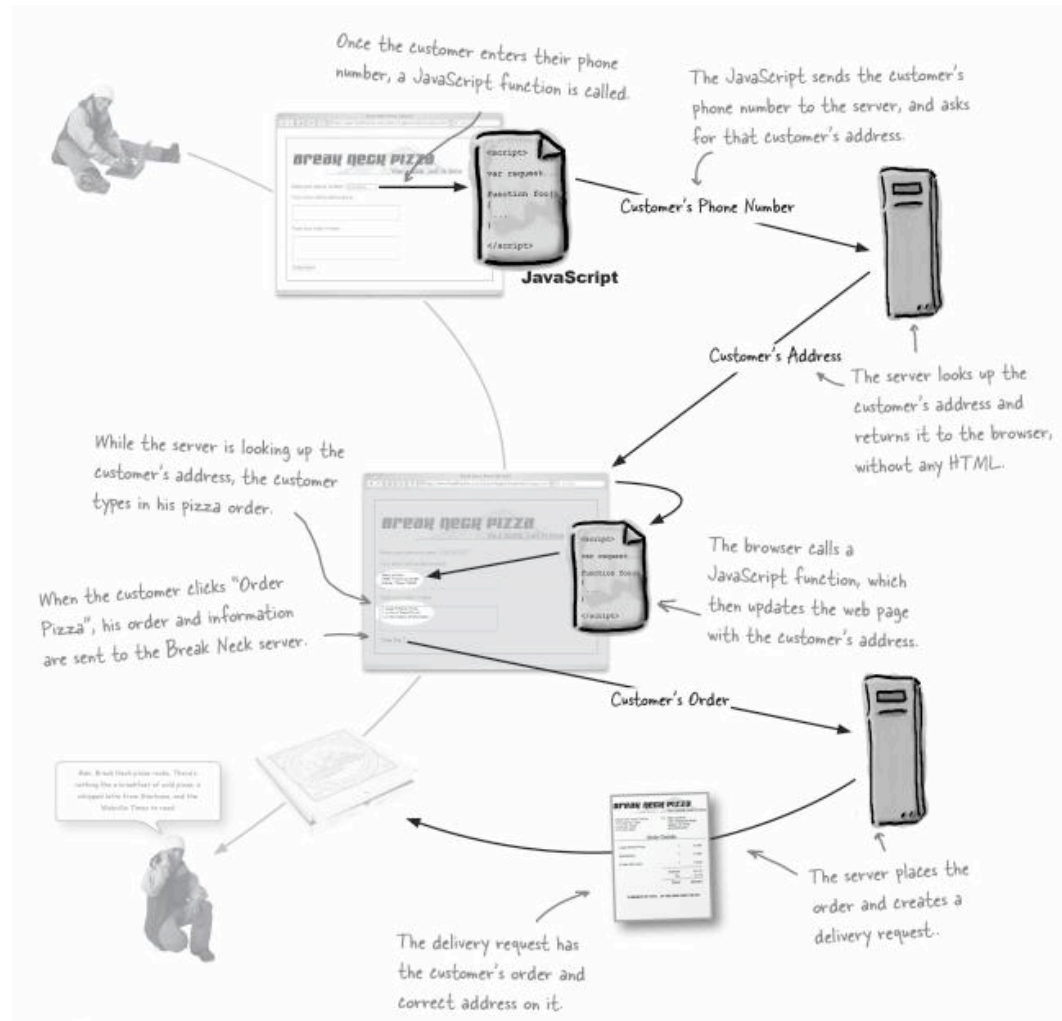

Your Projects

- What are your data sources?
- What will Iteration 1 look like?

Ajax Interaction

Behind the Scenes

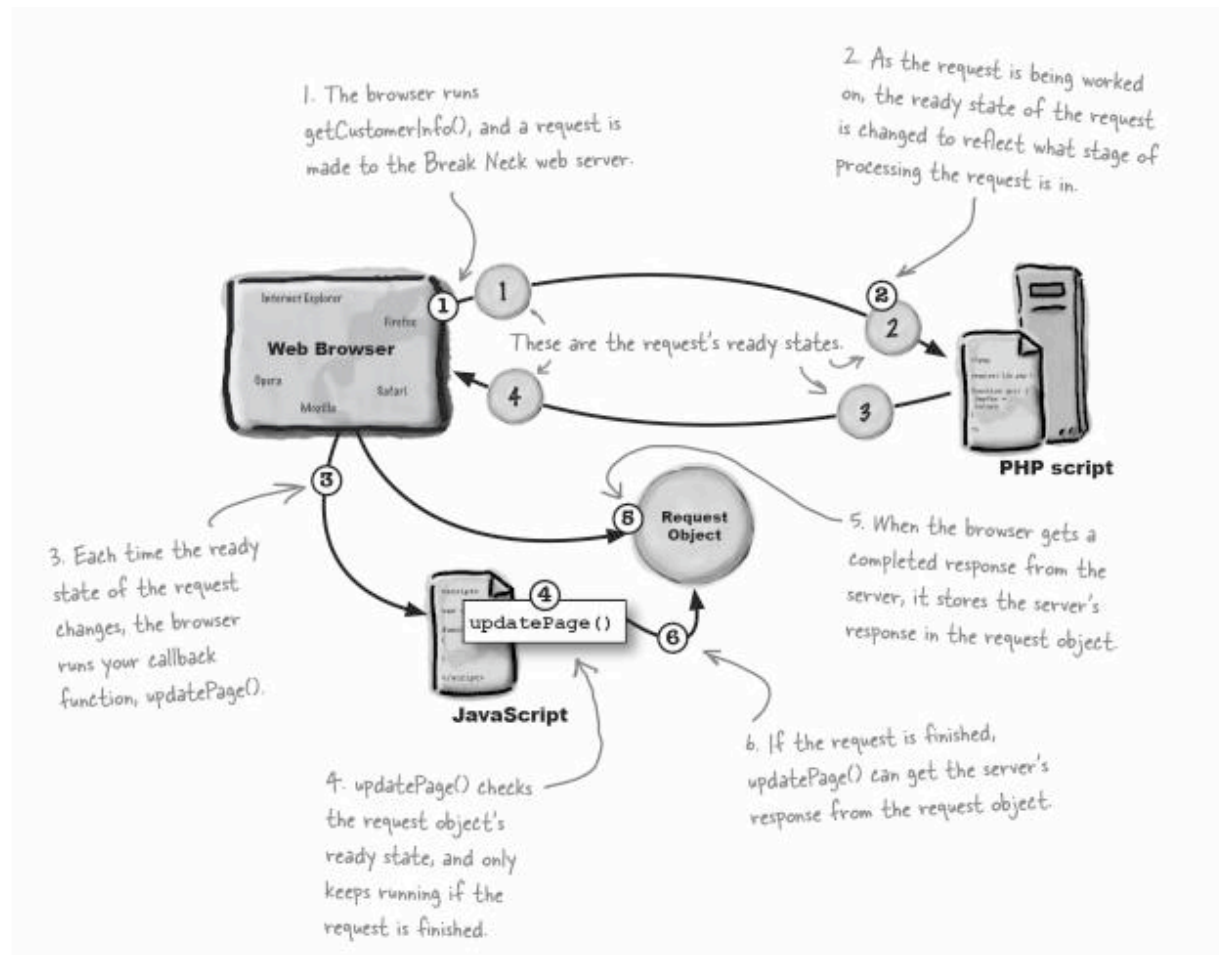

Request Objects

- The object that handles server interaction
- Different for
 - Non-IE browsers vs. IE
 - Different versions of IE
- Best done as static code

Ready States

- 0: Connection uninitialized
- 1: Connection initialized
- 2: Response in progress
- 3: Getting server response
- 4: Server response ready
 - Only take action in ready state 4

Browser's response to ready states

Summary

- Make sure you are working through the book.
- For projects:
 - What are your sources?
 - What can you do, practically?
