

Course Wrap-up

A long and winding road

Learning Remix

Project Review

Components

- Agile Development
- Web 2.0
- Social Processes

Agile Development

- Multiple iterations
- Discover requirements
- Discover issues
- Figure out what to address in what order

Web 2.0

- Ajax: Open standards to the front
 - HTML
 - Javascript
 - XML
 - HTTP
- Data, the new Intel inside

Social Processes

- The wisdom of crowds
- Learning remix
 - Social conventions in tagging
 - All information is visible
- Do these scale? How?

For Next Week

- See my [blog post](#) for additional requirements beyond the usual
- A diagram showing all the software components and how they communicate.
- What would you have done differently?
- Using IS215, how would you change your project to appeal to a broad audience?
