

Computing Services

At the University Library, we have made it a priority to keep up with growing student demand for computers. Currently, there are more than 600 computers for student use in the Halle Library building. To accommodate all our users and their needs, we have designated the various computing areas for different uses.

Library Research

(WebVoyager and Library Databases)

Information Commons (first and second)

Communication Commons (second level)

Computing Commons (third level)

E-Mail, Chat and WebCaucus

Communication Commons (second level)

Computing Commons (ground level)

Exploring the Web

Microsoft Office Applications

(Word, Excel, PowerPoint, etc.)

Computing Commons (ground level)

Laptop Use

If you have a laptop, you are welcome to use it in the Halle Library building. Not only does the building have a wireless network, but it also has several hundred ports scattered throughout the four levels. For information on using a laptop in the library building, visit Academic and Technology Integration Services' "Use of Laptop in Halle Library" at www.emich.edu/public/lt/laptop.

Acceptable Use

All users of computing facilities in the University Library must abide by Eastern Michigan University's "Acceptable Use of Information Technology Resources" statement and the "University Statement on the Appropriate Use of Communications Media." People who violate acceptable and appropriate use of library computing facilities are subject to disciplinary action.

Both statements are available on the Web:

"Acceptable Use of Information Technology Resources"

(www.emich.edu/public/lt/acceptable.html)

"University Statement on the Appropriate Use of Communications Media"

(www.emich.edu/public/lt/statement.html)
