

TC-1 Basics

September 20-21, 2008

Art Department — Eastern Michigan University

Learn how to prepare an image for weaving, how to assign weaves, and how to prepare a digital file for the loom. You'll be provided with a digital template and a selection of weaves to get started. Each person will work at a computer workstation with Photoshop and JacqCAD installed, and will have an opportunity to weave a small study piece. By the end of the weekend, you should have a much clearer understanding of what is involved in designing for a hand jacquard loom.

Limit: 6 students

For additional workshop information, email Pat Williams, <pwilliams@emich.edu>
