What did you like most about this instructor and course?
- The little jokes the prof made to lighten up the mood
- The practice tests for every chapter were very helpful while studying
- The graphs were pretty nice. Especially the supply and demand one. The giant X's made me feel like I was on a treasure hunt.
- This economics instructor was the best I ever had. He knows how to explain things to us to get us into the topics.
- I enjoyed his knowledge of the subject, he knew what he was talking about
- The class is challenging and is well organized
- Very nice Prof. Seems to know a lot about the topic
- Very organized presentations makes material VERY clear. Numerous assignments/quizzes cements understanding. Enthusiasm creates interest. OUTSTANDING teaching
- He was very knowledgeable of the subject
- Very organized and willing to help
- He presents Material in an understanding way
- He kept the course as interesting as it can be and that there are points earned besides the exam
- Instructor is very helpful and available for answering questions

What did you dislike most about this instructor and course?
- No curve
- The lectures were dull and it was hard to sit through 2 and a half hours at a time
- His grammar made some things difficult to understand. But English sounds like his second language so it's understandable
- I did not like the small quizzes in the middle of class that were graded if they were right or wrong. Most of those questions were things we did not cover yet
- His grade setup, extremely hard to get a deserving grade
- The textbook used is obviously covering republican economics, so you have to take it w/ a grain of salt
- The test questions are far off from what we learned in class, it seems like they are separate
- Nothing...really
- It was a lot of material presented each class. May not be a good summer course
- Sometimes overcomplicated concepts
- The math problems on the exams are confusing and different from the ones presented in class
- The quiz at the beginning of the class
-How bland and fast paced the material is

What constructive suggestions do you have for this instructor or course?
-When you are quizzing us for the first time on a subject answer all questions we have even if it means walking us through the whole problem again. This class was very challenging. It might be because I took it in summer but since it is a summer class all questions students have must be answered
-None really. Have more enthusiasm?
-You need more assignments than just the tests and small 2 pt quizzes I feel like I understand the course material way better than what my grade says about me because I am a bad test taker
-Allow for a project or have a dropped lowest test to help perhaps. Overall enjoyed the class, not necessarily the test. I studies but didn’t always get the grade I felt I deserved.
-Make the tests an material discussed in class align better. Exams are much more difficult when we don’t learn the proper material.
-Keep up the good work
-More take home homework
-Because this is a short course, the exams should have allowed 1 page of notes be used. The course in the spring/summer is too much info and really needs help on 3 exams
-I had a hard time grasping the amount of information presented in such a small amount of time maybe if we had homework the test would be easier. It also seemed like the supplements on line were easier questions than on tests and quizzes
