Grade:

Books
This book gives students information. What makes it stand out from the rest is its accompanying CD which keeps the students interested.

This is a paperback book that contains various facts and information relating to dinosaurs. It is more for child reading than teaching, but can be used to do research for assignments and whatnot.

This is a rhyming story that aids in giving students a brief introduction to dinosaurs. What makes this book interesting is that there are two eyeballs in the book that wiggle and jiggle as the book is moved around. This will help to get students interested.

This book is full of various lessons relating to dinosaurs. The variety in this book is great because there is something pertaining to just about every aspect that a teacher could be looking for.

Websites
This website has really great dinosaur clip images and some dittos that are printable for teacher use.

This website has very neat interactive games and activities to help students increase their knowledge of dinosaurs.

This site has many facts and activities for children and teachers to improve their knowledge on dinosaurs. It is well set up separating the information into categories and providing detailed explanations for just about everything.

This site has a very good dinosaur unit with many different activities that can either be used, or adapted. It also links to 5 different webquests that all seemed very good.

**Audio**

**Software**
This looks at history, geography, biology, and other facts about dinosaurs and their lives.
Travel back in time and take pictures of dinosaurs. The neat part is that you need to know about them in order to track them down and stay safe to survive the ordeal.
Dino Park Tycoon. (1993). MECC
Create and design a dinosaur park. Students are able to gain math skills.
Dinosaur Adventure. (1993) Knowledge Adventure
Combines dinosaur facts with films, cartoons, and games. Helps to expand students understanding.

**Videos**
Recreates what the world would have looked like when the dinosaurs were here.
Good visuals for students
Computer animated film that brings dinosaurs to life and allowing students to visualize the information they have learned.
